

IN THE CLAIMS

1. An apparatus for erasably marking documents, comprising:
a reusable transparent sheet composed of non-top coated polyester film, the sheet
having a first side and a second side, a top edge on the first side and a top edge
5 on the second side;
a clamping device for securing the sheet to the document to be marked.
a dry erase marking pen for marking the first side of the sheet.
2. The apparatus of Claim 1, further comprising the top edge of the first side of the sheet
having an adhesive coating wherein the clamping device is adhered to the sheet.
- 10 3. The apparatus of Claim 1, further comprising an eraser for erasing the markings.
4. An apparatus for erasably marking documents, comprising:
a reusable transparent sheet composed of vinyl, the sheet having a first side and a
second side, a top edge on the first side and a top edge on the second side;
a clamping device for securing the sheet to the document to be marked;
15 a marking pen containing water soluble ink for marking the first side of the sheet.
5. The apparatus of Claim 4, further comprising the top edge of the first side of the sheet
having an adhesive coating wherein the clamping device is removably adhered to the sheet.
6. The apparatus of Claim 4, further comprising an eraser for erasing the markings.
7. An apparatus for erasably marking documents, comprising:
20 a reusable transparent sheet comprised of non-top coated polyester film, the sheet
having a first side and a second side, a top edge on the first side and a top edge
on the second side, the top edge of the second side having an adhesive coating
for securing the sheet to the document; and
a dry erase marking pen for marking the first side of the sheet.
- 25 8. The apparatus of Claim 7, further comprising an eraser for erasing the markings.

9. An apparatus for erasably marking documents, comprising:
a reusable transparent sheet composed of vinyl, the sheet having a first side and a second side, a top edge on the first side and a top edge on the second side, the top edge of the second side having an adhesive coating for securing the sheet to the document; and
a marking pen containing water soluble ink for marking the first side of the sheet.
10. The apparatus of Claim 9, further comprising an eraser for erasing the markings.
11. An apparatus for erasably marking documents, comprising:
a reusable transparent sheet composed of non-top coated polyester film, the sheet having a first side and a second side, a top edge on the first side and a top edge on the second side, wherein the top edge of the first side of the sheet has an adhesive coating whereby the clamping device is adhered to the sheet;
a clamping device for securing the sheet to the document to be marked;
a dry erase marking pen for marking the first side of the sheet; and
an eraser for erasing the markings.
12. An apparatus for erasably marking documents, comprising:
a reusable transparent sheet composed of vinyl, the sheet having a first side and a second side, a top edge on the first side and a top edge on the second side, wherein the top edge of the first side of the sheet has an adhesive coating whereby the clamping device is adhered to the sheet;
a clamping device for securing the sheet to the document to be marked;
a marking pen with water soluble ink for marking the first side of the sheet; and
an eraser for erasing the markings.
13. An apparatus for erasably marking documents, comprising:
a reusable transparent sheet comprised of non-top coated polyester firm, the sheet having a first side and a second side, a top edge on the first side and a top edge on the second side, the top edge of the second side having an adhesive coating for securing the sheet to the document;
a dry erase marking pen for marking the first side of the sheet; and
an eraser for erasing the markings.

14. An apparatus for erasably marking documents, comprising:

a reusable transparent sheet comprised of vinyl, the sheet having a first side and a second side, a top edge on the first side and a top edge on the second side, the top edge of the second side having an adhesive coating for securing the sheet to

5

the document;

a marking pen with water soluble ink for marking the first side of the sheet; and
an eraser for erasing the markings.
